

INDEPENDENT TEXTILE COMPLIANCE AUDIT — FAISAL WEAVE INDUSTRIES

Audit Reference: EXP-FWI_FSD_001-20260412 Audited by CertVerify Pakistan (Pvt) Ltd. Date of issue: 2026-04-12

Legal entity	Faisal Weave Industries
City / Site	Faisalabad, Punjab, Pakistan
Factory ID	fwi_fsd_001
Primary products	Denim, Cotton woven, Home textiles
Audit scope	EU CBAM (Reg 2023/956), UK Modern Slavery Act 2015 §54, EU CSDDD (Dir 2024/1760), ISO 14001 surveillance, SA8000 social compliance, OEKO-TEX, REACH SVHC effluent screening
Audit method	On-site inspection, sample chain-of-custody, effluent grab samples (3 points), HR log review, management interview

1. Certifications & certification status

Certification	Status	Valid until	Issuer	Notes
SA8000	EXPIRED	2026-01-15	SAI	Expired 2026-01-15; auditor recommends immediate re-audit booking.
ISO 14001	VALID	2026-09-30	Bureau Veritas	Surveillance audit on file. Valid for full scope of EU/UK shipments.
OEKO-TEX	VALID	2026-12-01	OEKO-TEX Institute	Surveillance audit on file. Valid for full scope of EU/UK shipments.
GOTS	MISSING	—	—	Not held. Required by at least one buyer's commercial Code of Conduct.

2. Export profile and buyer concentration

Total annual export value reported by management: **PKR 425.00 crore**. Breakdown by purchasing buyer (FY 2025):

Buyer	Annual order value (PKR)	Share of total	Buyer HQ jurisdiction
NordStyle Group	PKR 190.00 crore	44.7%	EU (Sweden)
BritMart Retail	PKR 145.00 crore	34.1%	UK (Ireland-listed, UK-regulated)
EuroThread SA	PKR 70.00 crore	16.5%	EU (Spain)
Tesco	PKR 20.00 crore	4.7%	UK

3. Self-reported compliance claims (factory submission)

The following statements were provided by Faisal Weave Industries's compliance team in the quarterly self-report (source filename in parentheses). These statements are recorded verbatim and used as the LEFT-HAND side of the contradiction check in Section 5.

- *"Factory is ISO 14001 compliant — effluent fully within legal limits"* (source: *faisal_weave_self_report_q1_2026.csv*)
- *"SA8000 audit completed and current"* (source: *faisal_weave_self_report_q1_2026.csv*)
- *"Average weekly working hours: 48"* (source: *faisal_weave_self_report_q1_2026.csv*)
- *"Chemical discharge meets EU Reach standards"* (source: *faisal_weave_self_report_q1_2026.csv*)

4. Independent audit evidence (third-party measurements)

Metric	Measured value	Unit	Date	Source document
water effluent discharge	12.0	ppm	2026-03-12	water_audit_march25.pdf
weekly working hours	68	hours	2026-02-20	certverify_labour_audit_feb26.pdf
overtime hours	22	hours/week	2026-02-20	certverify_labour_audit_feb26.pdf
co2 per unit	3.4	kgCO2/garment	2026-01-31	carbon_calc_jan26.csv
lead in dyes	95.0	ppm	2026-01-22	chemical_lab_report_jan26.pdf

5. Auditor cross-check (claim vs evidence)

The cross-check below compares Section 3 (self-reported claims) against Section 4 (independent measurements). Any inconsistency triggers a recommended remediation in Section 6.

#	Self-reported claim (source)	Audit evidence (source)	Confidence	Verdict
1	Factory is ISO 14001 compliant — effluent fully within legal limits [faisal_weave_self_report_q1_2026.csv]	water_effluent_discharge = 12.0 ppm (EU REACH/CBAM limit: 8 ppm) [water_audit_march25.pdf]	0.91	CONTRADICTION
2	SA8000 audit completed and current [faisal_weave_self_report_q1_2026.csv]	weekly working hours = 68 hrs (SA8000 ceiling: 60 hrs incl. overtime) [certverify_labour_audit_feb26.pdf]	0.93	CONTRADICTION
3	Average weekly working hours: 48 [faisal_weave_self_report_q1_2026.csv]	Independent labour audit recorded 68 hrs/week [certverify_labour_audit_feb26.pdf]	0.88	CONTRADICTION
4	(no CBAM filing claim in self-report) [—]	No CBAM declarant registration or quarterly filing record located in the audit evidence pack [(audit evidence pack)]	0.95	GAP

Finding 1 rationale. Self-report asserts compliance with effluent limits; lab measurement exceeds 8 ppm REACH ceiling by 50%.

Finding 2 rationale. SA8000 §7.1.1 caps total weekly hours at 60 including overtime; observed value exceeds ceiling.

Finding 3 rationale. Self-reported weekly hours differ from third-party measurement by more than 4 hours.

Finding 4 rationale. Factory exports to EU; CBAM scope applies; no filing record exists. This is a regulatory GAP rather than a CONTRADICTION because the factory has not made a conflicting positive claim.

6. Auditor risk summary and recommended remediation

Compliance score (0-100)	43
Risk level	CRITICAL
Estimated orders at risk	PKR 34.00 crore
Buyers materially affected	NordStyle Group, BritMart Retail, EuroThread SA
Audit issued by	Independent third-party (this report)

CRITICAL. The factory's compliance posture is unsuitable for continued shipment of NordStyle Group and BritMart Retail orders without immediate remediation. The headline risks are (i) SA8000 social-compliance certification has lapsed since 15 January 2026; (ii) no CBAM declarant registration is held despite roughly 61% of exports going to EU jurisdictions; (iii) lead-in-dye measurements at 95 ppm exceed the EU REACH-aligned 90 ppm ceiling; (iv) measured weekly working hours of 68 exceed the SA8000 60-hour ceiling and contradict the factory's self-reported figure of 48 hours; (v) the EU Corporate Sustainability Due Diligence Directive supply-chain narrative is not on file; (vi) GOTS certification is not held, restricting access to organic-cotton product lines. The self-reported claim of ISO 14001 compliance is materially inconsistent with the third-party water audit evidence (12.0 ppm effluent vs an 8.0 ppm limit). Without remediation the auditor recommends a hold on EU/UK shipment authorisations until certificate renewals are completed and CBAM registration is filed. Estimated revenue at risk within the next 12 months is PKR 34 crore. The mobile ExportIQ pipeline ranks the actions automatically and produces remediation artifacts including the CBAM declaration template, buyer communication drafts for NordStyle Group and BritMart Retail sourcing managers, and the SA8000 re-audit application letter.

This report was generated for the AISEEKHO 2026 Google Antigravity Hackathon submission (ExportIQ). It contains realistic but synthetic data for the named factories.
