

EU REACH — Restricted Substances in Textiles (SVHC)

Jurisdiction: EU Source: <https://echa.europa.eu/regulations/reach/understanding-reach>

Key requirements relevant to Pakistani textile exporters:

- **REACH Annex XVII Entry 43 (azo) / Entry 72 (formaldehyde).** Azo dyes that can release carcinogenic aromatic amines are prohibited in textile articles. Formaldehyde must not exceed 75 ppm for infant articles and 300 ppm for skin-contact garments.
- **REACH Annex XVII Entry 63 (lead) / Entry 47 (Cr VI).** Lead content in textile dyes must not exceed 50 ppm per OEKO-TEX Standard 100 and EU REACH Annex XVII restrictions. Chromium VI must stay below 3 mg/kg.
- **REACH Annex XVII Entry 46a (NPEs).** Nonylphenol ethoxylates (NPEs) are restricted in textile articles, and effluent discharge must stay within environmental limits (8 ppm reference ceiling).
